

# **WORLD PATIENT SAFETY EPICENTRE**

**#Patientsafety \* People \* Knowledge \* Solutions**

# WHY DOES PATIENT SAFETY MATTER ?

*„In honor of those who have died, those left disabled, our loved ones today and the world’s children yet to be born, we will strive for excellence, so that all involved in healthcare are as safe as possible as soon as possible. This is our pledge of partnership”*

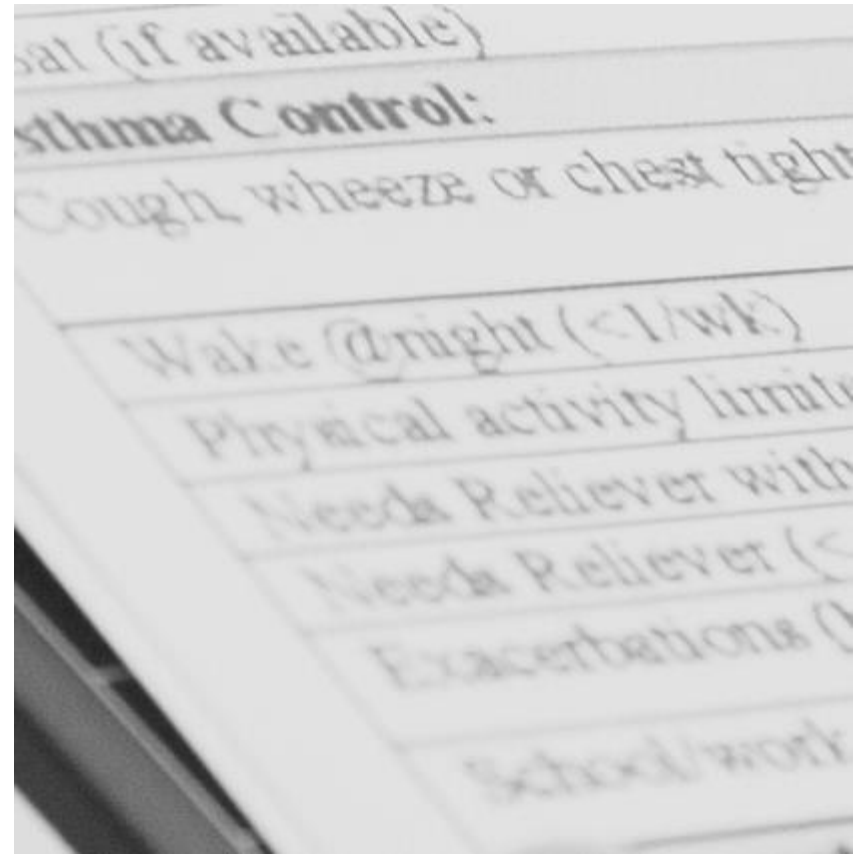

*March 26, 2006*

*-London Declaration Patient Safety*

---

# Why should we create Patient Safety Epicentre?

- Because knowledge is divided between different platforms
- Because no place gathering all Patient Safety issues exists
- lack of universal taxonomy and semantics
- the need for constantly actualized information is a must
- Because it would spare time, necessary for action
- Because such center would unify efforts worldwide
- Because it would set standards and serve as a reference to less developed health care systems

- OECD
- G20
- EU
- WHO

**Who can create Patient Safety  
Epicentre ?**

---

**WHAT REALLY**

**THE EPICENTER SHOULD BE?**

**We should create a free open-collaborative online platform (hub/network), maintained by community of professional medical editors**

**The content should provide educational materials, listing of relevant institutions and people involved with Patient's Safety**

# WHAT SHOULD BE THE TRAITS OF A PATIENT SAFETY EPICENTRE ?

**interactive solutions**

**user-friendly**

*using innovative technologies*

---

# WHAT SHOULD BE THE TRAITS OF A PATIENT SAFETY EPICENTRE ?

*Adjustable to local conditions*

**Based on human factors  
and ergonomics**

*Practical*

---

# COCKPIT

In the next slides i would like to present examples of what should be included in Patient Safety Epicenter
